

# Exam vena cava

Entity: Cluster

<b>Concept description:</b>		<b>Identification:</b>			
unknown		<i>Id:</i> openEHR-EHR-CLUSTER.exam_vena_cava.v0 <i>Reference model:</i> openEHR_EHR			
Purpose	Use	Misuse	Copyright	References	Contact
The report the results of an vena cava examination. This archetype is used in the context of Eurotransplant.	Regarding Flow: It contains inside this cluster a Status-item and a CodedText with the same name as the cluster. The status item (also coded text) contains only one item: "Not investigated", it is optional, as also is the other coded text. Because the archetype model, currently, does not support dependent conditions, it must be used in this way: - It is important to understand the following: Like a business-rule following must be noted: A coded text must be used if the status-item is not used. On the other hand, if the status-item ("Not investigated") is used, the other coded text in the same cluster will be ignored by the software.				Bert Verhees, ROSA Software
