

Exam ascites freefluid

Entity: Cluster

Concept description:		Identification:			
unknown		<i>Id:</i> openEHR-EHR-CLUSTER.exam_ascites_freefluid.v0 <i>Reference model:</i> openEHR_EHR			
Purpose	Use	Misuse	Copyright	References	Contact
Archetype to register ascites. This archetype is used in the context of Eurotransplant. It indicates the presence of ascites/free fluids.	Regarding Ascites/ free fluid: It contains inside this cluster a Status-item and a CodedText with the same name as the cluster. The status item (also coded text) contains only one item: "Not investigated", it is optional, as also is the other coded text. Because the archetype model, currently, does not support dependent conditions, it must be used in this way: - It is important to understand the following: Like a business-rule following must be noted: A coded text must be used if the status-item is not used. On the other hand, if the status-item ("Not investigated") is used, the other coded text in the same cluster will be ignored by the software.				Bert Verhees, ROSA Software

Concept	Description	Constraints	Values
T Ascites/ free fluid	*	<i>Text</i> 0..1	Internal; 'None', 'Moderate', 'Significant ', 'Not assessable', 'Not investigated'
