To record Troponine test results as a single value. SNOMED 105000003 | Troponin measurement (procedure) | NB: This is not cloned in templates from laboratory-tests but specialized. The reason for this is that maintainability becomes hard when there are changes in the model, but the correspondending constraint can occur in more templates (which will happen because, ET decided to have archetypes which	To record Troponine test results as a single value.
