To record HbA1c test results as a single value. LOINC 4548-4 Hemoglobin A1c/ Hemoglobin.total in Blood Component Property Time System Scale Method Hemoglobin A1c/Hemoglobin.total MFr Pt Bld Qn NB: This is not cloned in templates from laboratory-tests but specialized. The reason for this is that maintainability becomes hard when there are changes in the model, but the correspondending constraint can occur in more templates (which will happen because, ET decided to have archetypes which can occur in several templates.	To record HbA1c test results as a single value. Normally used in conjunction with a parent Laboratory test result (Observation) archetype.	Should not be used to record Anatomical pathology macroscopic/microscopic findings.	© openEHR Foundation	Based on NEHTA 'Pathology Test' archetype.
